Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office action is in response to the amendment filed January 13, 2006.

The rejection under 35 U.S.C. 112, second paragraph as given in the previous Office action is withdrawn in view of the amendment by applicants to claim 16.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 31 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

New claims 31 and 32 are unclear as to the method of making a multiple electrode device wherein the process of solvent extraction is confusing as to the development process. Generally an extraction process involves the separation of an organic solvent from an aqueous solution wherein a separatory funnel is used, however the process step as recited in claim 31 and 32 require a development type step wherein a washing step is performed by puddling or contact by submersion of the electrode device. There is not separatory type funnel used or an extraction in the traditional meaning.

Correction or clarification is necessary.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. HEATH et al is cited to disclose a method wherein a bistable molecule is used in a process for forming multilayer thin films for making electrodes.
